

E FX Pilot 4 Smartphone, Mobile trading (m-trading) trade account management via mobile devices, such as a mobile phone or a Personal Digital Assistant.

E FX Pilot 4 Smartphone Edition is a mobile terminal for smartphones. Using it, you can get access to financial markets and make trades worldwide.

The embedded symbol charts and technical indicators, as well as financial news, will help to make a decision about whether to open or close a position. Trading via this terminal is fully confidential and absolutely safe. If it is necessary, you can find trading history in your MetaTrader 4 Mobile any time.

EFX Polit 4 Smartphone Edition:

- charts - a modern terminal cannot operate without graphical displaying of price movements;
- support of technical indicators that helps to analyze price movements on symbols;
- the full set of trade orders that allows flexible management of one's trading activities;
- sounds alerting about changes in the market - there is no need anymore to observe charts constantly;
- access to news allows making well-reasoned decisions regarding the most recent developments on financial markets.
