

E FX Pilot 4 is an online trading platform designed for financial institutions dealing with Forex, CFD, and Futures markets.

E FX Pilot 4 Client Terminal has been created to provide trade operations and technical analysis in real time mode, when working at Forex, CFD, Futures financial markets. A wide range of orders allows flexible management of trading activities.

As well as many technical indicators and line studies, there is built-in language for trade strategies programming MetaQuotes Language 4. Using this language, you can create Expert Advisors, Custom Indicators and Scripts. Expert Advisors can analyze the situation on the market, make decisions, put pending orders, and open positions in on-line mode without trader's participation. Custom Indicators, just like technical ones, can analyze the situation on the market and generate various signals. As for Scripts, they are designed for single execution of some actions.
